# LUSTR STORY

The story of **LUSTR** is the story of a visionary who sees the imminent shift in diamond jewellery and is here to transport you to a new world. A futuristic world where you can experience **first-hand**, the **exquisite** and **ethical labgrown diamond jewellery**. A world that lets you indulge in labgrown diamonds for generations. Carrying a golden legacy that stretches over years, LUSTR's founders namely **Devashish Agarwal, Dhruv Ranka & Divit Agarwal** are not ones to rest on past laurels.

Venturing from traditional gold jewellery to **lab-grown diamond jewellery**, they have penned a new, luminous chapter in **LUSTR's** tale. It's a leap not just of innovation, but of foresight, discerning the evolving tastes of modern consumers. Drawing upon their profound expertise in age-old craftsmanship, they are poised to infuse a distinctive touch to the avant-garde realm of **lab-grown diamonds.** This transition isn't merely a business move—it's a testament to their unwavering commitment to **sustainable luxury** and **visionary leadership.**

# WHAT DRIVES US

For far too long the world of diamonds has been propped at an unattainable pedestal where only a few could reach. Though their perceived emotional value is something one cannot put a price tag on, their exorbitant monetisation has created a huge market gap.

We are here to bridge that gap–making exquisite, ethically crafted diamond jewellery accessible without compromising on beauty, quality, or meaning. We believe luxury should inspire, not intimidate.

# UNDERSTANDING LABGROWN DIAMONDS?

**Lab-grown diamonds** are created in controlled laboratory environments using advanced techniques like **High Pressure High Temperature (HPHT**) or **Chemical Vapor Deposition (CVD).**

They share the same physical, chemical, and optical properties as natural diamonds but are produced with significantly less environmental impact and without the ethical concerns linked to traditional mining. They look the same, shine the same, and are more **sustainable** and **affordable**—making them a **smart, ethical choice for modern luxury.**

# PROBLEM

## OVERPRICED

Traditional diamonds often carry inflated costs due to artificial scarcity and industry markups.

## GATEKEEPING

The diamond market has historically limited access, making luxury exclusive to a select few

## ENVIRONMENTAL HARM

Conventional diamond mining causes significant ecological damage and resource depletion.

# SOLUTION

## FAIR VALUE

Lab-grown diamonds deliver genuine quality and brilliance at a price that reflects their true value—without inflated markups.

## INCLUSIVE LUXURY

By democratizing access, lab-grown diamonds invite more people to experience exquisite, responsible luxury.

## SUSTAINABLE

Produced with minimal environmental impact, lab-grown diamonds represent a conscious choice for a greener future.

# OUR EDGE

**Reliable:** Backed by generations of jewellery expertise, we ensure quality, trust, and craftsmanship.

**Affordable:** We bring opulence within reach—offering premium designs at transparent, attainable prices.

**Quality:** Our diamonds ( Type IIA ) belong to the top 2% globally—completely pure, with no chemical impurities.

**Customisation:** Everyone has a story, and we're here to help you wear yours. With a friendly hand, we assist you in crafting jewellery that's not just precious but personal. Let's co-create magic.

**Craftsmanship:** Rooted in decades of expertise, our jewellery embodies world-class craftsmanship—each piece a reflection of heritage, precision, and timeless artistry.

**Modern:** Interpretation of jewellery to match the modern-day needs.

**Ethical Luxury:** All our diamonds are lab-grown, conflict-free, and environmentally conscious.

# GROWTH STRATEGY

LUSTR's growth begins with a **flagship store** launch **(3–6 months),** followed by national expansion across key Indian cities **(12–18 months)**.

Over the next **3–5 years**, we aim to establish a **global footprint** — positioning LUSTR as a leader in ethical, lab-grown diamond luxury.
