Nomadiq

AI predicts. Nomadiq books. You save.

People want to book flights at the lowest possible price

Traditionally achieved through manual price tracking - **checking fares across websites multiple times a day**, waiting and hoping for prices to drop, and booking manually when the fare looks right.

Price Volatility

Fares change ***100–500*** times a day

Expensive Outcome

₹5K–₹15K average loss per international ticket

→ *Problem*

Airfare prices change constantly, and travellers never know the right time to book.
They end up overpaying because no platform tracks price drops and **auto books at the price drops.**

→ *Solution*

Automatically books flights the moment ***prices*** drop

Smart booking

Nomadiq tracks fares ***24/7*** in real time and ***automatically books when the price drops***, securing the lowest fare without effort.

AI-powered fare forecasting

Predicts airfare drops using historical data + live trends, estimating when and how much the ***price will fall***.

Effortless Experience

Hands-free, stress-free travel planning ***Works 24/7*** while you're busy or sleeping. No monitoring, no guesswork — just guaranteed savings with zero effort.

Initial Focus

|

Global AI automation

Use-cases

1. ***Ask Anything About Flight Prices***
Travellers ask natural questions like "When is the cheapest time to fly Delhi → Dubai next month?" and get instant, data-backed answers in seconds.

2. ***Real-time Market Prediction for Any Route***
Users see intelligent forecasts showing whether fares will go up or down and why, built from real market signals—not guesswork.

3. **integrate smart booking in train and hotels**
To build a global AI-driven booking platform for flights, trains, and hotels

4. ***AI-based Route & Date Strategy***
Users explore "what-if" scenarios (flexible dates, nearby airports, multi-city) and Nomadiq calculates the smartest and cheapest combination automatically.

5. **Global Expansion**
To power travel bookings across the US and Europe as the intelligent infrastructure that automates decisions, secures optimal prices, and removes friction from global travel.

6. ***Smart Booking (Core Feature)***
Nomadiq tracks fares 24/7 using predictive modelling and automatically books at the lowest price at the perfect moment—zero manual checking, zero stress, real savings.
